

## FLAT SEAM WALL PANEL

Available in multiple sizes

- Wall application only
- The panels are roll-formed from 24ga gauge coated steel
- Easy to Install with clips, provided
- Minimum Slope 3:12

### Installation

Easy to Install with provided clips

Recommended Underlayment: High Temp

Panels must be installed over a completely waterproofed structure in order to ensure watertightness.

If the waterproof membrane is mechanically attached with metal fasteners of any type, fasteners should be covered to protect the under-side of the metal roof panels.

### Trim & Flashing

All Trim & Flashing is to be 24ga Kynar Painted Steel.
